CSE0001 – DIGITAL LITERACY PROJECT REPORT

TITLE PAGE

Name: Prakhar Agarwal

Registration Number: 25BAI10782

Branch: CSE (AI/ML)

Year: 1st Year

Course Code: CSE0001

Course Title: Digital Literacy

Date: 31 March 2026

INTRODUCTION

Digital literacy is an essential skill in today's technology-driven world. As a student, being digitally literate means not only knowing how to use digital tools but also understanding how to use them safely, responsibly, and effectively. In this project, I took on the role of a Digital Ambassador to explore various aspects of digital literacy. The project includes creating an awareness infographic, building a digital portfolio, exploring coding platforms, learning professional communication through email etiquette, and understanding cybercrime and its prevention. Through these tasks, I gained practical experience in using online platforms and developed a better understanding of responsible digital behavior. This project helped me improve both my technical and communication skills.

TASK 1 – INFOGRAPHIC

For this task, I used Canva to create a digital literacy awareness infographic. My design focused on three main topics: the importance of digital literacy, safe internet practices, and professional online presence. The infographic explains how students can use digital tools effectively while also being aware of online risks like phishing and data theft.

I included simple visuals, icons, and short text to make the information easy to understand. The design highlights key practices such as using strong passwords, maintaining privacy, and building a professional profile online.

One interesting part of this task was learning how to present complex information in a simple visual format. The challenging part was arranging all the content neatly in a single page without making it look cluttered. Overall, this task improved my creativity and design skills while helping me understand the importance of spreading digital awareness.

TASK 2 – DIGITAL PORTFOLIO

In this task, I created and updated my profiles on GitHub, LinkedIn, and HackerRank. These platforms are important for building a professional online presence.

GitHub is used for showcasing coding projects and collaboration. I created a profile README that includes my name, branch, and learning goals. LinkedIn is a professional networking platform where I added my education details, including my current degree and institution. HackerRank is a coding practice platform where I can improve my programming skills.

These platforms will be very useful for my future career. Over the next four years, I plan to regularly update my GitHub with projects, connect with professionals on LinkedIn, and practice coding problems on HackerRank. This will help me prepare for internships and job opportunities.

This task helped me understand the importance of maintaining a professional digital identity from the beginning of my college journey.

TASK 3 – PLATFORMS

For this task, I explored both coding and collaboration platforms. I used HackerRank for coding practice and completed a beginner-level problem. This helped me understand basic programming logic and improve problem-solving skills.

For collaboration, I created a Google Form titled "Digital Literacy Awareness Quiz" with five questions. The form includes multiple-choice and short-answer questions to test knowledge about digital safety and tools. I also viewed the responses in Google Sheets.

This task showed me how useful these tools are in academics. Coding platforms help in improving logical thinking, while Google Forms can be used for surveys, quizzes, and data collection.

The most interesting part was creating my own quiz and seeing how responses are collected automatically. These tools will help me in assignments, projects, and group work throughout my academic journey.

TASK 4 – EMAIL ETIQUETTE

In this task, I learned how to write professional emails and understood the importance of proper communication. Poor digital communication can lead to misunderstandings and missed opportunities.

For example, if a student sends an email without a proper subject or greeting, the professor might ignore it or misunderstand the request. Similarly, using informal language in professional emails can create a negative impression.

To avoid such issues, emails should always include a clear subject line, polite greeting, structured content, and proper closing. Learning email etiquette is very important for academic and professional success.

This task improved my communication skills and taught me how to present requests in a respectful and professional manner.

TASK 5 – CYBERCRIME

While researching cybercrime, I chose the topic of phishing attacks. I was surprised to learn how easily people can be tricked into sharing sensitive information through fake emails or websites.

One important lesson I learned is that even a small mistake, like clicking on an unknown link, can lead to serious consequences such as financial loss or data theft.

As a result of this task, I will change my habit of clicking links without verifying the source. I will always check website URLs, avoid sharing personal information, and use secure passwords.

This task made me more aware of online threats and how to stay safe in the digital world.
